

PDM-40W

Desktop Stamp Laser Engraver.

Working area: 10"x 7"

**Performance:**

1. Digital control circuits embedded module-driven system, with stable performance.
2. Laser and the most advanced lasers used internally, and company's laser power for matching the remarkable increase its useful life.
3. Revolutionary structural design, and end the old seal machine Yi deformation, the history that the old seal machine is easy to be out of shape and the light road is unstable is now a thing of the past an adjustment for permanent.
4. New jig design, low noise, steady and reliable, maintenance free.
5. To present with cooling systems and auto-exhaust system.

Technical parameters:

Model PDM-40W-E (engraving)
PDM-40W-EC (engraving and cutting)
MAX engraving area (clamp area): 10"x 7"
Laser type: Hermetic CO2 Laser Tube
Laser Power: 40w
Engraving Speed: 16"/s
Minimum Shaping Character: (0.04" x 0.04") (1x1mm)
Power Supply: AC 120V / 60HZ
Repeat precision: ≤0.0005"
Communication interface: Parallel port
Drive type: Stepper motor
Cooling mode: Water Cooling
Software: Moshi
Graphic Format Supported: BMP, JPG

Applicable material:

It is professional used to engrave the seal or stamps, small art and craft, gift and ornament, Organic Glass, Acrylic, Leather, PVC, Wood, and Plastic.

Price: 40W \$1'040.00
